FEATURES

AiSteth helps you see the sound, as both spectrogram and waveform/line visualizations

For easy sharing with specialists for the second opinion. It enables easy teleconsultation and remote diagnosis

Detect and identify anomalies in heart and lung sounds - using state-of-the-art signal processing and machine learning models

AiSteth can be used both as a traditional analog stethoscope, as well as a digital stethoscope with your smartphone

Our mobile app ensures that all your patient and clinic data is safely stored in the cloud

Advanced Bluetooth feature ensures seamless connectivity to your smartphone during auscultation

AiSteth™
See the Sound

FEATURES

AiSTETH - SMART STETHOSCOPE

The AiSteth™ smart stethoscope and app comes loaded with multiple features to empower doctors to auscultate & analyse accurately with ease.

AiSteth™ is a next-generation smart stethoscope that helps doctors auscultate with greater accuracy by turning the sound into visuals directly through our mobile app.

AiSteth™ helps you **See the Sound** - to screen, to detect, and to predict cardiovascular disorders with advanced Ai/ML integration.
